School of Information Studies, McGill University — *Montreal, Canada*

Research Assistant — *Sept. 2019 - Present*

- Designing, building, and troubleshooting firmware & hardware of a wearable limb-based input system from scratch
- Due to COVID-19, we made some technical trade-offs so that the experiment can be conducted remotely by mailing experiment materials to the participants' home contact-free. Built the mats embedded with pressure sensors to track foot movement using Arduino; Designed and built the interface displayed on screen using Python TkInter and PySerial.
- Collecting and analysing performance data using the prototype, semi-structured interviews, and System Usability Questionnaire to qualitatively and quantitatively analyse the difference in interaction patterns, performances, and user preferences between older adults and their younger peers.

School of Creative Media, City University of Hong Kong — *Hong Kong, P.R.China*

Research Assistant — *Sept. 2018 - May 2019*

- Provided technical support in Arduino programming and circuit design & troubleshooting for other PhD students.
- Designed and developed hardware and firmware prototypes for visually challenged schoolchildren based on Arduino and C, e.g. musical building blocks introducing programming languages, thermal display systems for geographical education, etc.
- Co-designed and co-conducted user study experiments.

Dept. of Electrical and Compute Engineering, McGill University *Montreal, Canada*

Research Intern *July 2017 - Oct. 2017*

- Developed the hardware and firmware of a foot-based interactive system based on Arduino, C, and VICON for seated musicians. Co-designed the menu layout in Unity using C#. Co-designed and conducted qualitative & quantitative usability study through interviews & NASA-TLX questionnaires.
- Enhanced the performance of an existing prototype generating burning-hot illusion with Electro-Muscular Stimulation. Improved temperature detection accuracy by 37.5% by re-designing the system, switching from thermal variable resistors to digital sensors.
